

CLIMATEGUARD[®] SPECIALTY WINDOWS

GLASS BLOCK WINDOWS

While glass blocks can be incorporated for decorative appeal, the most common applications are utilitarian; often implemented for privacy and/or security in basements and bathrooms. ClimateGuard utilizes a 3" thin line block which permits the design of virtually any combination and dimension. For ventilation and air flow, add windows (usually a hopper style) or vents (usually a dryer vent) set into our glass blocks.

✓ Improved thermal efficiency reduces energy costs all year long

✓ Thick, break-resistant glass blocks deter would-be intruders, enhancing the security of your home

✓ Air-tight glass blocks reduce drafts, dirt, allergens and block noise

✓ Obscured glass offers privacy while still allowing natural light into your home

- Fabricated to meet highest remodeling & building standards
- Provides both security and design appeal
- Excellent insulating U/R values at .53/1.89
- Can be installed in both brick and wood openings
- Allows for maximum light transmission
- Constructed with water-proof masonry cement
- Dryer vent or vinyl hopper vent optional

GLASS BLOCK WINDOW PATTERNS

CLEAR

See-through glass ideal for areas where visibility and maximum light is needed.

WAVE

An attractive marble glass obscures visibility for privacy while still transmitting light

DIAMOND

A crystal diamond glass increases privacy with efficient transmission of light in bathrooms and basements

ICEBERG

Complex pattern obscures visibility to provide maximum privacy while continuing to transmit light

CLIMATEGUARD® SPECIALTY WINDOWS

RESIDENTIAL GRADE GLASS BLOCK HOPPER VENT

- Welded main frame is stronger than mechanically fastened vents and provides an air-tight seal
- Special fasteners prevent movable sash from loosening
- 1/8" heavy aluminum bar stock hinges for lasting strength
- Dual durometer seal is integrated directly into sash
- U.V. stabilized vinyl extrusion maintains overall durability and performance
- Extrusion designed key locks provide a strong installation bond
- Available in standard white frame color with frosted or clear double glazed glass
- Fiberglass charcoal screen keeps bugs out

RESIDENTIAL BASEMENT ESCAPE WINDOW

- Heavy gauge vinyl extrusion
- Welded main frame is stronger than mechanically fastened windows
- Air-tight seal
- Double glazed sash
- Screen pushes out easily from the inside
- High visibility latches and locks
- Dual durometer seal is integrated directly into sash
- U.V. stabilized vinyl extrusion maintains overall durability and performance
- Available in standard white frame color with frosted or clear double glazed glass
- Custom sizes available
